The Tent is designed with clear span structures, has an internal space, which is free of internal or external support bars. You can choose different shapes and sizes from 3 to 60m for Events, Weddings, Parties or even warehouses.

No matter what the usage is, Pure Experience can always meet your requirements.

Clear span structures design also has characteristics for long-term use, normally described as temporary structure rather than simple tents, they can be used for long-term storage and commercial use. Unlike the permanently fixed structure, our Aluminum Tent does not need any basic preparation. It's suitable for most ground surfaces such as concrete and grass. It is assembled in just a few days (depending on the sizes).

Aluminum tent adapts high strength extruded and anodized aluminum which is in the lightweight, corrosion resistant, attractive and durable. Closed frame design and double PVC-coated polyester textile, which is waterproof, cannot be affected easily by weather such as wind and rain. Furthermore, it adapts modular design, easy to dismantle and transport after using and can be changed to other locations for multiple installations. The size can be increased or the shape can be changed by additional components.

In addition to the aluminum tent, we also offer a wide range of tent accessories. Mainly including floor, lighting, tables and chairs, glass doors, solid walls and so on. We mainly provide safe & high quality outdoor marquees used for weddings, parties, events, exhibitions, celebration ceremonies, festivals, storages, Majlis and Back of house offices, sport events any sizes required.

Pure Experience can make it easy for you.

CAR PARKING SHADES

Pure Experience is one of the pioneers in Car Parking Shades in the Middle East region. We offer different types of high- quality car parking shades for residential and commercial purposes all over UAE. We use only high-quality car parking shades that are made to perform longer and protect your vehicles from the sun rays.

Our Car Parking Shade type can be installed individually or in series form depending upon the specified plan layout for the shade. With PVC Fabric and HDPE material our shade includes variety of designs that are available in the standard size and also custom size for client needs. Our car parking shades products are built to withstand the harsh climates of the Middle East region. They block up to 96% of the sun's UV rays, reducing their harmful effects on the skin and creating a cozy temperature. The fabric used in our shades allows air circulation preventing heat from being trapped.

Why do you need Car Parking Shades in UAE?

UAE is known for its scorching heat and daily news of car combustion during summer. As the country is growing at a fast pace, with more and more people finding shelter in the UAE, the number of vehicles on the roads is increasing at an exponential rate.

This pushes us to provide context for an architectural structure and a game-changing urban landscape design - Car Parking Shade. Pure Experience is the best Car Parking Shade supplier across UAE.

TENSILE STRUCTURE

We aspire to produce world-class Tensile Shades structures, which are kept relatively light in weight by deriving their structural stability from their pre-stressed shape, instead of the mass of the material used.

Our suppliers they are perfect in building all sorts of tensile structures, and the team offers a comprehensive range of services from load analysis, detail design, concept design, manufacturing, and installation to ensure that all our clients receive the best professional service.

All of our fabric structures are robustly constructed, fully engineered, and permanent to offer years of practical and stunning outdoor protection from the natural elements. We can offer a wide array of fabric options, running the gamut from silicon coated woven glass fabric to an architectural grade PVC.

The silicon coated glass promises a longer life than other materials offered by our competitors. All the tensioners and canopy fixers are marine grade stainless steel. Many of the fabric structures can be cost-effectively and easily changed or adapted in size to fit within your existing environment.

MOTORIZED PERGOLAS

The essential design of the structure is combined with the lightness of the fabric, thus creating a unique style. Refined and practical, pergolas with sliding cover will be the ideal choice to complement the beauty of an outdoor space. When it comes to an outdoor entertaining, installing a pergola is one aspect that homeowners should look at closely. The properly designed and managed shade system can protect you from the unpleasant beating afternoon sun so that you can have a comfortable and joyful outdoor experience with your loved ones.
